SUMMARY

Accomplished Full Stack Developer with over 4 years of comprehensive experience in designing, developing, and maintaining robust web applications. Proficient in front-end and back-end technologies, including JavaScript, React, Python, Django, Java, and SQL, with demonstrated expertise in leveraging modern frameworks and tools to create efficient, scalable, and user-friendly applications. Furthermore, I am adept at working in agile environments, collaborating with cross-functional teams to deliver high-quality solutions that meet business needs.

EXPERIENCE

Full stack developer

Konza Technopolis Development Authority

December 2023 – Present

- Worked in a team to improve Konza National Data Centre Requirements Form as a backend developer hence more services availed to clients by 50%.
- Documented Software Requirements Specification Documents which aided quality assurance activities; testing and validation.
- Undertook technical analysis of software solutions offered by software vendors for performance optimization, scalability assessment and security.
- Participated in code reviews which helped identify potential risks early in the development phase and hence an efficient product at the end.
- Contributed to design discussions and brainstorming sessions that ensured improved decision making.
